S S Plastic comprehensive menu of services takes you from Fabrication and structural fabrication to field support for tasks such as lamination repair or equipment installation. With a team of skilled and experienced manpower we have handled fabrication of equipment's ON-SITE as well as OFF-SITE, at domestic as well overseas. With the given experience we work on any given system viz, HDPE, PP, PPFRP/ PVC. We do have experience in Fabrication of equipment from initial stage of mould making till complete assembly of the desired equipment.

Apart from the above we also carry out installation of the required equipment at site with precision and also connecting them with the associated piping / equipment.

We're equipped to repair equipment and facilities as companies grapple with corrosive chemicals in their manufacturing processes. We can fix it. We also handle linings, new equipment repairs, and rehabilitation of worn out or damaged equipment.

We do work in co-ordination with the engaged consultants, and in-process follow various standards (ASTM, BS...) as required.

We do have hands-on experience of working/handling of various RESIN SYSTEM, viz....GENERAL PURPOSE , ISOPHTHALIC , VINYL ESTERS, SUPER VINYL ESTERS.....
